PROFILE

Senior Software Developer focused on React and TypeScript, with experience in Node.js, API integration and SQL-backed applications. At Liberty Mutual, I build Direct Sales quoting and checkout flows connected to federated GraphQL services. Earlier work includes enterprise applications at Motorola, multi-brand interfaces for Honda Canada and a promotion-planning product for Procter & Gamble. Testing, accessibility and reliable state and data flows are part of my delivery practice.

SELECTED EXPERIENCE

FEB 2026 —
PRESENT

Senior Frontend Developer · Liberty Mutual Insurance

Direct Sales quoting and checkout across React/TypeScript frontends and federated GraphQL services.

- Build customer-facing flows and work with GraphQL service contracts across repositories; weigh dependency and styling trade-offs for maintainability.
- Develop AI-assisted ticket, PR and CI workflows; review Figma fidelity, diagnose flaky pipelines and use code review to share decisions.

STACK React · TypeScript · Node.js · GraphQL · CSS / SCSS · AI/MCP · Playwright

SEP 2025 —
FEB 2026

Senior Frontend Developer · Hanson Regan / Client: Ploom

Global B2C platform spanning multiple Next.js apps and 27 localized sites, connected to CMS, commerce and regional services.

- Delivered reusable React/Next.js features across 27 localized sites and integrated Builder.io content with shared components.
- Built feedback flows connecting web, email, Telegram and a regional service; contributed to analytics and authentication fixes.

STACK React · TypeScript · Next.js · Builder.io · GraphQL · Magento

MAR 2025 —
SEP 2025

Senior Frontend Developer · Luxoft / DXC / Client: SKAT/ESL

Frontend feature development within an existing application and established architecture.

Implemented and maintained components and features, following the existing codebase and team conventions.

STACK React · TypeScript · Redux · Cypress

SELECTED EXPERIENCE — CONTINUED

JUL 2023 — MAR 2025	Frontend Architect / Tech Lead · Luxoft / DXC / Client: Procter & Gamble • Internal promotion-planning application used by approximately 40 business managers. • Authored frontend low-level design within an existing high-level architecture; built spreadsheet-like editing and validation. • Implemented backend-driven page composition with Redux and a draggable campaign timeline. • Built a four-person frontend team including myself; combined leadership with hands-on delivery. MVP in approximately nine months. STACK React · TypeScript · Redux · REST APIs
MAY 2022 — JUL 2023	Tech Lead Full Stack Developer · Assembly Canada / Client: Honda Canada Shared components and application functionality across multiple brand websites on an existing Sitecore platform. • Reworked reusable React components and isolated local state to reduce unnecessary rendering and visible flickering. • Worked extensively with Cypress and Cucumber, writing tests before implementation in a test-first / BDD workflow. STACK React · JavaScript / TypeScript · Node.js · Sitecore · Cypress · Cucumber

SELECTED & EARLIER EXPERIENCE

FEB 2018 — MAY 2022	Full Stack Engineer → Team Lead Frontend / Technical Product Owner · Motorola Solutions Enterprise application development, followed by frontend leadership for the corporate web platform. • Developed React and Node.js functionality using PostgreSQL-backed middleware that consolidated external-service data. • Contributed to reusable Storybook packages, accessibility and decoupled analytics; later led a frontend team. STACK React · Node.js · PostgreSQL · Storybook · Adobe AEM
2001 — 2017	Earlier Web Engineering & Leadership Experience • Co-founded a web-development business, delivered custom frontend/backend systems and later led a ~25-person digital/IT department.
